

YX026-CEL

Directional Outdoor Signal Antenna (for YX500-CEL)

The YX025-CEL is an optional outdoor antenna upgrade for the YX500-CEL which provides additional signal strength in interior spaces and is used to increase the area of improved cell coverage. The antenna is recommended for areas with very weak outdoor signals strength to provide peak system performance. The YX026-CEL yagi antenna replaces the omni-directional signal antenna and provides 11 dBi of gain. All hardware is included to mount on masts up to 1 5/8" diameter.
